

DDoS Mitigation Services

NTT AMERICA MANAGED SECURITY

KEY FEATURES

- Rapid response intercepts & filters out DDoS attack traffic
- Legitimate traffic passes to customer application servers, minimizing business impact of attack
- Significant capacity and reach
- NTT America engineers work with the customer to quickly react to changing attack vectors
- Subscription-based model
- Available to all NTT America customers

Protecting your IT Infrastructure

DDoS Mitigation from NTT America

Distributed Denial of Service (DDoS) attacks can strike at any time, potentially crippling an enterprise's IT infrastructure and severely degrading its internal users' and customers' experiences. Depending on the type and severity of the attack to a website, the impact can result in thousands or even millions of dollars of lost revenue. Enterprises need to take precautions to ensure they can react swiftly and effectively to the threat.

Recognizing the ongoing and increasing threats from these types of attacks, NTT America has deployed Best of Breed capabilities to stabilize the situation in the event of a DDoS attack, identify root causes and filter traffic until the threat subsides.

Built upon leading DDoS protection platforms, NTT Communications' global Tier 1 IP network and NTT America's 24x7 expert monitoring of its data centers, NTT America's DDoS Mitigation Services allow for swift and effective actions to minimize the effect of an attack.

The service is available to all customers on a monthly subscription basis.

Once the customer suspects an attack:

- Customer contacts NTT America's Certified Engineering Center

- NTT America performs preliminary analysis to confirm attack
- NTT America will deploy mitigation if a DDoS attack is suspected
- Mitigation platform filters out attack traffic, allowing legitimate traffic through to the customer application
- Once the attack subsides, original routing is restored
- NTT America works with the customer on any issues that have surfaced due to the attack

WHY NTT AMERICA'S DDOS MITIGATION?

- Best of Breed DDoS Mitigation technology
- Global IP network enabling mitigation routing to be applied nearer the source of the traffic
- The service is available to all customers on a monthly subscription basis
- NTT America takes an end-end view across the technology and the customers' infrastructure
- Experienced, professional engineers monitor the situation 24x7

MOVING FORWARD
