One-stop Management, Support and Billing Worldwide

NTT America's Virtualization Services offer customers significantly increased efficiency and performance from their IT infrastructure, while at the same time delivering better availability and time to market.

Virtualization Services are available in the US, Europe and Asia, offering customers an efficient way to rollout global infrastructure rapidly.

SERVICE BUNDLES

Standard service bundles are available in all locations based on the number of cores and memory:

BUNDLE	CORES	MEMORY
Fundamental	4	16
Enhanced	8	32
Premium	16	64
Test	8	32

ONE VIEW AROUND THE WORLD

There are many challenges in operating a global IT infrastructure – operating conditions, language, currency and technical variations to name a few.

Through Virtualization Services customers can operate a global capability through one point of contact that takes care of implementation and management, and works with them to deliver the global solution that best fits their needs.

Specific bundles based on the US offering are available in Europe and Asia offering consistent service. NTT America provides the management of these services directly to the customer. The customer can also utilize the customer portal to monitor and manage their solution.

MOVING FORWARD

Contact us today to learn more about how NTT America's Virtualization Services can provide you with a Global IT Infrastructure through one local vendor.
