

Managed SAN Services

NTT AMERICA MANAGED STORAGE

With the ever-increasing dependence on always-available enterprise data, Storage Area Networks (SAN) provide the most direct value in assuring data security, maximizing availability, and ensuring business continuity.

NTT America's managed SAN service utilizes industry leading hardware, software and best practices to deliver security, availability and performance. Our team of highly experienced storage professionals has a wide variety of experience and skills in storage and associated technologies, ensuring that customer requirements are matched to the right solution.

NTT America SAN Services Architecture

Scalable Storage Solutions

MANAGED SAN SERVICES FROM NTT AMERICA

SAN is ideal for storage of most types of content, but its high availability and reliability make it particularly effective for mission-critical databases.

WHY NTT AMERICA'S SAN SERVICE?

- Multiple security measures including authentication and data isolation which include zoning and LUN masking

- Advanced features including replication and snapshot
- Monthly billing means there is no capital investment by the customer
- NTT America manages end to end storage infrastructure and associated services, as well as external vendors
- Rapid provisioning of additional capacity

MOVING FORWARD

Contact us today to learn more about how NTT America's SAN storage services can provide the performance and security your solutions need.

Managed SAN Features	
Availability	NTT America-managed HBA – 99.5% Customer-managed HBA – 99%
Data Protection	RAID5 or RAID10
Supported OS	Windows, Linux, Solaris
Drive Configuration	FC 15,000 RPM disk
Reliability	No single point of failure Battery back-up
Supported Applications	VERITAS, Oracle, Microsoft Exchange, SQL Server among others
Monitoring	24x7 monitoring by NTTA Storage Engineering team
Servicability	Non-disruptive firmware upgrades 24x7 support
Minimum capacity and increments	64 GB
